USB Recovery Software help to fix USB drive errors and all the problems related to USB Key drives. USB Hard Drive Recovery Software program enables you to access the data stored on a USB hard drive even when your computer is unable to access the drive. The program supports all FAT and NTFS formatted USB hard drives. The USB Hard Drive Recovery Software Program have many of the standard recovery features that you would expect in a simple utility including undelete, data recovery, restore partition tables, and registry recovery. The program also supports USB external hard drives, such as the external USB hard disk drive. Please note: The recovery software will not backup files stored on USB-connected portable devices. When USB portable device connected to the computer, a series of messages is displayed on the screen, similar to those displayed when a portable device is inserted into a normal USB port. The USB Recovery Software will try to communicate with these devices, but will not backup any data contained thereon. If you are installing the software to a USB drive, do so from an alternate drive. **REMOVE: You MUST be logged on to save items
