Set in exotic locations from ancient Mesopotamia to ancient Greece and the Ancient Roman Empire. - Mounted Combat. Cavalry of all kinds and different sizes can be used in combat. You can even mount your Pegasus and charge like a wild Centaur! - Multiple Game Modes. Many different game types and variations in game mechanics including card based, company based and other variations.

[The results of the treatment of craniofacial trauma in young children]. The authors report the results of treatment of 17 children with craniofacial trauma (CFT) and severe associated injuries. All the children underwent surgery within 8 hours after the injury. Injury severity, time to surgery, coexisting injuries and complications were evaluated. The diagnosis was made preoperatively in all cases. All the children were treated by open method. Seven children were treated with brain or neck injuries only. Five children with combination of head and neck injury were treated by internal fixation of the mandible using plates and screws. There was no complication in all the children. The follow-up periods ranged from 14 to 45 months. The authors conclude that CFT is not always a serious injury and the standard surgical treatment of fractures in children is effective and safe.

Q: DNS problem with static IP in iPhone application I have developed a iPhone application that has some web services. These services were working correctly until I changed my connection to a static IP. I can successfully call a web service when I am using dynamic DNS to resolve the IP. The application no longer can connect to these services when I use a static IP. What do I need to do to make this work? Has anyone had this issue before? Thanks John A: Couple of things you can do. try unplugging/replugging your network cable (I have had this issue when my computer was on a separate network) Try using NSURLConnection instead of ASIHTTPRequest

NEW DELHI: The Department of Telecom has asked mobile operators, including Bharti Airtel, Vodafone India and Idea Cellular, to continue with the existing 82157476af
